

Appendix A to Reproductive Hazards and the Pregnant Worker

Pregnancy Declaration Form

I, _____, voluntarily declare my pregnancy to California State University, Fullerton, 800 North State College Blvd. Fullerton, CA 92831 on _____. I understand I will be working in a laboratory/studio at Fullerton which contains chemicals and or radioactive materials known to the state of California to cause cancer or reproductive toxicity. Access the chemical list website at <https://oehha.ca.gov/proposition-65/proposition-65-list>. I understand exposing a pregnant female to excessive amounts of chemicals listed as teratogens may cause damage to the developing embryo or fetus. Teratogenic chemicals are included in a broader category of chemicals labeled with an "R" in the special information area on chemical warning labels and the Safety Data Sheet(s).

Environmental Health and Safety is the primary source of information on using any chemical at Fullerton. I may obtain a list of chemicals used in my research or instructional lab/studio from the Principal Investigator/Instructor. I understand I may obtain Safety Data Sheets on chemicals used by accessing the EHS Office website <http://ehs.fullerton.edu/>, and accessing Safety Data Sheets on the home page, Services section.

I understand California State University, Fullerton encourages me to provide the list of chemicals used to my health care provider, so I may make the most informed decision throughout my pregnancy while working with chemicals and or radioactive materials.

Note: I may revoke this declaration at any time without explanation by submitting a signed and dated statement requesting the revocation.

Pregnancy Consultation Form

_____ (declared pregnant woman) reviewed the risks of working with chemicals and or radioactive materials through the Reproductive Hazards and the Pregnant Employee/Student program. If working with radiation while pregnant, the declared pregnant woman received a complete copy of the U.S. Nuclear Regulatory Commission Regulatory Guide 8.13, and given the option to participate in a monitoring program for pregnant workers.

Declared Pregnant Woman* (signature): _____ Date: _____

Estimated Conception Date: _____ Estimated Delivery Date: _____

EHS Representative or Radiation Safety Officer (signature): _____

* I understand the radiation exposure limit set by the Nuclear Regulatory Commission for embryo/fetus of the declared pregnant worker is 500 mrem (5 mSV) for the entire gestation period. In line with CSUF's policy of minimizing radiation exposure, I will continue to maintain occupational radiation exposure "as low as reasonably achievable" (ALARA).
